

Please do not enact Docket 4521, a proposal for increasing minimum PIC hours for charity flights from 200 to 500. This will significantly reduce the pool of pilots available to donate their time and expenses to help those who really need it. In addition, please do not change the Part 91 sightseeing operations to Part 135. The data does not support the need for this. The livelihood of thousands of sightseeing operations and their pilots would be severely affected. We are having enough problems trying to survive in general aviation -- please do not jeopardize that. Thank you.
